Electronic Packaging and Production Index for 1987

Articles and news stories published in Electronic Packaging and Production in 1987 are listed here alphabetically by title, under what is considered to be the main theme. The four categories they have been divided into are:

Assembly
Hybrid Circuit Processing
Packaging
Printed Circuit Processing

Assembly . . .

"Automatic Guided Vehicles Move PCBs Between Assembly Stations," Donald H. Daebler, March, pg 42.
"Automatic Identification is Essential to Automation," Don Small, March, pg 24.
"Automatic Inserters Still Prominent," T. Ronald Pound, January, pg 15.
"Automatic Labeling Speeds EPROM Programming," Howard Markstein, September, pg 25.
"AOI 'Sees' Better, Users Say," S. Leonard Spitz, June, pg 48.
"Automatically Inspecting Boards," Göran Åsemyr, May, pg 91.
"Automating a Printed Circuit Card Line," Stuart Cooper, October, pg 88.
"Automating Surface-Mount Assembly in a European Plant," M. Maes, March, pg 30.
"Automating the Small Production Line," R. Hamilton and R. Borst, October, pg 96.
"Automation Award to Westinghouse," Robert Keeler, April, pg 14.
"Boundary Scan Vies for SMT Test," T. Ronald Pound, November, pg 13.
"Careful PCB Design Enhances Conformal Coating Performance," Roger Olson, September, pg 79.
"Chinese Factory to Automate Electronics Manufacturing," T. Ronald Pound, May, pg 13.
"Cleaning Solvents Face Freeze," Linda Smith-Vargo, August, pg 13.
"Conformal Coatings Seal Out Adverse Environments," Howard Markstein, March, pg 82.
"Contract Assembler Hones SMT Reflow," Robert Keeler, July, pg 16.
"Contract Assembly to Quicken," T. Ronald Pound, August, pg 16.
"Contract Manufacturing Demands Flexibility," T. Ronald Pound, May, pg 12.
"Design Linked to Computer-Aided Manufacturing," Richard Holt, September, pg 24.
"ESD Control Begins at Ground Level," Margaret Choudhury, August, pg 41.
"ESD Control: Making It Work," Robert Keeler, March, pg 65.
"Ethics Clash at Electro/87," S. Leonard Spitz, September, pg 18.
"Functional Test to Grow," Robert Keeler, February, pg 14.
"The Impact of PCB Processing on Surface-Mount Assembly," Christopher G. Amick, March, pg 104.
"Industrial Engineers Boost CIM," S. Leonard Spitz, February, pg 16.
"An Inside Look at Flux Formulations," Wallace Rubin, May, pg 70.
"IC Surface Mounting Gains With Standard Packages," T. Ronald Pound, April, pg 46.
"Integrated In-Line PC Board Assembly," Terry Siden, May, pg 98.
"Integration to Cut Manufacturing Overhead," Robert Keeler, June, pg 13.
"Japan Unveils Below-the-Surface-Mount Technology," Kinshi Itoh, May, pg 12.
"Laser Inspection System Provides Process Control Data," Bill Roeger, Ron Morrison, February, pg 128.
"Lasers for High-Reliability Soldering," Robert Keeler, October, pg 29.
"Lasers Solder Mainframe Discrete Wiring," Howard Markstein, August, pg 13.
"Machine Makers Set SMT Standards," T. Ronald Pound, February, pg 16.
"Machine Vision Inspects SMT Solder Joints," Robert Keeler, December, pg 16.
"Machine Vision Makers Need Focus," Robert Keeler, October, pg 16.
"Make It Where? A Vital Decision," S. Leonard Spitz, November, pg 26.
"Manufacturing Around the Globe," S. Leonard Spitz, July, pg 12.
"Minimizing Defects in Surface-Mount Assembly," Charles-Henri Mangin, October, pg 66.
"Mixing Man and Machine," Richard Paiva, June, pg 65.
"More SMD Mounters Appear In Japan," Kinshi Itoh, October, pg 18.
"New Technology Inspires New Competition," Margaret Choudhury, December, pg 66.
"PCB Assemblers Propose Full-Service Contracts," Michael Perdue, November, pg 32.
"Personal Computers Link Islands of Automation," Russell Briggs, March, pg 58.
"Portable Conveyors Increase PC Board Production," Bill Ogg, February, pg 46.
"Post-Solder Cleaning Meets Its Match in SMT Geometry," Robert Keeler, January, pg 86.
"Quality Control for Surface-Mount Technology Manufacturing," Robert Froehlich, August, pg 69.
"Robotic Vision With Luminescent Tagging," William G. McGinniss, January, pg 24.
"Robotic Workcells For PCB Assembly," Dave Schnedler, February, pg 108.
"SCARA Robots Awaiting Standards," Robert Keeler, July, pg 13.
"Selecting an Optical Microscope and Conforming to Mil Specs," Richard Schwartz, December, pg 59.
"Sink or CIM?" S. Leonard Spitz, March, pg 34.
"Solderability Testing of Surface-Mount Devices," Gert Becker, October, pg 32.
"Solder Pads Are Customized," Linda Smith-Vargo, March, pg. 16.
"Specialty Solders Outshine Tin/Lead in Problem Areas," Robert Keeler, July, pg 45.
"SMT Boosts Contract Manufacturing," Robert Keeler, February, pg 18.
"SMT Council Sets Priorities," Robert Keeler, March, pg 13.
"SMT Forces Good Management Practice," T. Ronald Pound, June, pg 18.
"SMT Reflow: IR or Vapor Phase?" Howard Markstein, January, pg 60.
"SMT Repair is Automated," S. Leonard Spitz, February, pg 14.
"Through-Hole Component Inserters: A Time of Transition," Robert

"Dense Packaging of Medical Electronics," Howard Markstein, June, pg 12.
"Enhancing Thick-Film Adhesion on Alumina Ceramic," Bill Bischoff, Ray Petit, March, pg 97.
"Fast Creation of Hybrid Photomasks In-House," Rodger Dwight, September, pg 40.
"Going Hybrid With PTF Resistors," Barrie Jones, January, pg 118.
"High-Density SMT Hybrids Meet the Needs of Military Applications," J.A. Bauer, P. Scher, M. Davis, June, pg 72.
"Hybrid Manufacturing is Tailored to Automotive Needs," Patrick Chester, May, pg 94.
"New Ceramics Fill Performance Gaps," T. Ronald Pound, September, pg 30.
"Process Decreases Value of Thick-Film Resistors," Robert Keeler, April, pg 13.
"Selecting a Packaging Approach for Power Hybrid Circuits," Jerry Sergent, September, pg 34.
"Thick-Film Inks Mark Hybrids With Today's Circuits," T. Ronald Pound, January, pg 111.

Printed circuit processing . . .

"Additive Processing Moves Ahead in Europe," T. Ronald Pound, February, pg 12.
"Artwork: Accepted," John C. Kelly, April, pg 63.
"Blind and Buried Via Fabrication," Mary Mollison, January, pg 106.
"British PCB Shop Prepares for New Era," Robert Keeler, June, pg 13.
"Complex Multilayer Boards Vie for Space in Japanese Computers," Hayao Nakahara, February, pg 70.
"CAD Cornerstones Fast, Economical PCB Reliability," David Rager, July, pg 28.
"Copper Surface Finish Promotes Solderability," Man Kei Ho, October, pg 39.
"Drilling: An Ancient Process With New Twists," S. Leonard Spitz, January, pg 96.
"Dry-Film Patent Expires," Linda Smith-Vargo, January, pg 13.
"Du Pont Recaps Electronics Picture," Robert Keeler, March, pg 18.
"Electroplating Systems for PCB Processing," Howard Markstein, July, pg 51.
"Engineers Run Experimental Designs to Improve PCB Quality," Linda Smith-Vargo, June, pg 26.
"Europeans Eye U.S. for Fab Equipment," Robert Keeler, March, pg 18.
"Far East PCB Makers Seize Shifting Opportunities," Hayao Nakahara, November, pg 30.
"For Higher Yield: Test or Inspect Bare PCBs?" S. Leonard Spitz, February, pg 96.
"From Schematic to PCB With Phototools," S. Leonard Spitz, May, pg 56.
"Give New Strength to Multilayer Bonding," Linda Smith-Vargo, February, pg 52.
"High-End PCB Market Gains New Entry," Howard Markstein, February, pg 13.
"How to Make Better FR-4," Ragnar Eliasson, October, pg 76.
"In-Mold Plating Forms Circuits," Robert Keeler, January, pg 20.
"ICs Demand More From Printed Circuits," Gerald Ginsberg, November, pg 40.
"Japan Responds to the Cost-Driven Market," Hayao Nakahara, December, pg 34.
"Japan's PWBs: Small Features for a Big Business," Kinshi Itoh, October, pg 70.
"Laminate Spurs High-Speed Digital Processing," Daniel Johnson, February, pg 80.
"Laminates Are Made in Continuous Press," T. Ronald Pound, February, pg 15.
"Laser-Drilled Blind Vias Increase PCB Real Estate," Dana Korf, February, pg 56.
"Laser Photoplotters Require High-Precision Film," Wick McCaleb, April, pg 58.
"Low-Waste Technology For Final PCB Etching," Linda Smith-Vargo, October, pg 52.
"Metalizing Through-Hole Interconnections," Linda Smith-Vargo, September, pg 56.
"Mobile Storage Protects Printed Circuit Artwork," Mark Haubenschield, January, pg 55.
"Molding Eliminates Rough PCB Holes," Robert Keeler, January, pg 18.
"Multilayer Prospectus Looks Healthy," Robert Keeler, January, pg 16.
"Multilayer Registration Runs at Production Speeds," Linda Smith-Vargo, June, pg 20.
"PTF Merges With Flexible Circuitry," Ken Gilleo, January, pg 125.
"Polymer Thick-Film Multilayers: Poised for Takeoff," Robert Keeler, August, pg 35.
"A PC Board Manufacturer Enhances Phototool Quality," Jim Knight, June, pg 30.
"PCB Revisions Simplified by Automatic Etch Cutting System," Ken Christopherson, March, pg 22.
"PCB Seminar Held in Thailand," Kinshi Itoh, April, pg 16.
"Process Detail Permeates Printed Circuit World Convention," T. Ronald Pound, October, pg 13.
"Process Windows Widen on Aqueous Resists," Linda Smith-Vargo, May, pg 65.
"Real-World Constraints on Printed Circuit CAD Performance," Robert Keeler, February, pg 88.
"Screen Printers Acquire Sophistication," Linda Smith-Vargo, March, pg 74.
"Solder Masks: Issues and Answers," S. Leonard Spitz, pg 64.
"Statistically Verifiable Design Rules for Flex Circuits," Joe Barckett, Darrel Brasch, May, pg 83.
"Streamlined CAD Saves 39 Days on Board Design," Steve Jackson, Robert Pezzuti, February, pg 44.
"Surface Preparation Ensures UV Solder Mask Adhesion," Alan Wang, February, pg 123.
"Tapping CAD Data for PC Board Panelization," Lisa White, March, pg 51.
